REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 1 and the claims dependent thereon have been allowed because the limitation in claim 1: "pyrolyzing of volatile matter in the solid fuels and converting it to hydrogen by reaction with calcined limestone" is not taught or suggested in the reference titled "Technical Progress in the Development of Zero Emission Coal Technologies" by Ziock et al. Fig. 2 in this Ziock reference appears to illustrate and teach the pyrolysis of a solid carbonaceous source to form methane, but does not teach the pyrolysis of the volatile matter to convert it into hydrogen via reaction with calcined limestone.

Claim 16 and the claims dependent thereon have been allowed because the Ziock et al. reference does not teach or suggest the claimed method for increasing the electric power output of an existing coal fired power plant by replacing the existing pulverized coal fuel with crushed or pulverized char fuel using either existing burners or retrofitting a boiler of the existing coal fired power plant with air-cooled slagging combustors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
